HALL & FOREMAN, INC. COMBINES WITH VVCE, INC.

IRVINE, Calif. July 25, 2006 — Hall & Foreman, Inc. (HFI), an engineering, surveying, planning, and landscape architecture firm, has combined forces with VVCE, Inc. (VVCE) of Victorville, Calif., a civil and traffic engineering and survey firm. The addition of VVCE expands HFI's professional service base and geographical coverage into the Victor Valley area of Southern California.

John Hogan, P.E., HFI's chief executive officer and principal noted, "We are pleased to join with VVCE. During VVCE's 13 years of operation, they have had a prominent role in the growth and development of the Victor Valley and have earned a reputation for proactive client service. HFI has a strong presence in the high desert so joining forces is a natural tie. It increases the depth of services we can offer the clients of both firms."

Ronald Kabalin, P.L.S., President of VVCE agreed, "We are looking forward to becoming part of the HFI family. The opportunity to join with a multi-location firm of HFI's stature increases the support we can provide our clients."

VVCE will become part of HFI and maintain its present location in Victorville. Mr. Kabalin will become a division president with HFI and continue to provide leadership and technical direction for the Victorville office. Projected revenue for the combined firm is expected to approach \$45 million over the next year. This business combination will bring HFI's total workforce to more than 250 employees. In addition to the newly acquired Victorville office, HFI has offices in Irvine, Rancho Cucamonga, Temecula, and Woodland Hills.
