SOUTHERN CALIFORNIA BASED FIRM RECEIVES PINNACLE AWARD
Hall & Foreman, Inc. is Recognized by Both CENews and Zweig Letter

IRVINE, Calif, April 18, 2008 – Hall & Foreman, Inc. (HFI) wins the Pinnacle Award. This award honors engineering firms that grow revenues significantly while creating a great work environment. HFI is one of only twenty three firms nationwide to receive this award.

The Pinnacle Award was created last year to recognize engineering firms that rank on both the CE News “Best Civil Engineering Firm to Work For” list and Zweig Letter “Hot Firm List”. For the fourth consecutive year HFI is listed by CE News and this is the firm’s fifth year on Zweig Letter.

CE News is the leading business magazine serving the civil and structural engineering markets. The nationwide contest was developed by CE News to recognize excellent workplaces with high levels of employee satisfaction and to provide a meaningful ranking of human resource issues in the civil engineering industry. This nationwide recognition assists engineering firms in their recruiting and retaining activities.

Zweig Letter’s “Hot Firm List” honors the 200 fastest-growing architecture, engineering, and environmental firms in the country with tremendous revenue growth. The list is based equally on percentage growth and dollar growth in gross revenue from fiscal year 2003 to fiscal year 2006.
