**CITY OF LOS ANGELES SELECTS ANDREW J. WILLRODT, P.E., LEED AP,
TO SERVE ON LID HANDBOOK COMMITTEE**

*Hall & Foreman, Inc. Low Impact Design Expert
Selected as Technical Partner for LID Committee*

SANTA CLARITA, Calif, July 12, 2010 – Andrew J. Willrodt P.E., LEED AP, was selected to serve on the City of Los Angeles’ Low Impact Development (LID) Handbook Committee as a Technical Partner. Mr. Willrodt is a project director / associate for Hall & Foreman, Inc. (HFI), a civil engineering, land planning, and surveying firm.

The City of Los Angeles’ effort to write the LID handbook guidelines is being led by the Bureau of Sanitation. To support the Bureau, the Technical Partners committee was established. The committee is comprised of industry experts who specialize in LID, water quality, and Best Management Practices (BMP). Engineers, builders, and landscape architects along with key City Staff members make up the committee. Industry expert members serve on a volunteer basis and will be actively involved in developing the details of the handbook guidelines.

Mr. Willrodt leads HFI’s sustainable design efforts. Since joining the firm in 2006, he has been instrumental in growing HFI’s involvement in LEED Certified projects and in coaching staff to earn LEED Accreditation. He is a member of the United States Green Building Council (USGBC). Mr. Willrodt graduated from the University of Texas with a bachelor of science degree in civil engineering and the University of Houston with a masters in business administration. He is a registered civil engineer in multiple states and is a Leadership In Energy & Environmental Design (LEED) accredited professional.
